he says that
cotton coupons were
members of the union, on
pans the farmers were each to state
their cotton acreage was last
year, and to write a pledge that it
would not exceed a given number of
acres this year. He adds:

"I have had every coupon tabulated, and the full report shows a reduction in cotton acreage of 30-1-3 per cent. The late cold, wet weather has caused a still greater reduction in acreage; then the web, or as some call it, the 'careless worm,' is stripping the foliage off of thousands of acres all over Texas, most of which will have to be planted over even at the late date.

"At the present outlook, this year's crop will not exceed 8,000,000 bales."

Municipal Control of Saloons.

Los Angeles, Cal., June 16.—Initiative petition will be placed in circulation within the next ten days asking the council to adopt an ordinance granting to a "benevolent corporation" the monopoly of the saloon business in Los Angeles. So say the organizers of the corporation which seeks to regulate the liquor traffic of Los Angeles along the line that has made Gotham famous. Subscription lists have been in circulation for the last week and a goodly portion of the half million dollars which will be needed to apply the Gutheburg system has already been subscribed.

Three Killed; Sixty Wounded.

Budapest, June 16.—Three killed and 60 wounded are the casualties resulting from a fight between a band of strolling players and villagers at Derekyghaz, Hungary. The players promised to give an exhibition of cannibalism and a big crowd collected, but when the players did not give the advertised exhibition, the villagers became threatening, whereupon one of the players became realistic and bit a piece from one of the spectator's ears. A general fight ensued.

Foundry Workers Go on Strike.

New York, June 16.—A strike inaugurated by the International Brotherhood of Foundry Employees, against the New York and New Jersey Foundrymen association, has extended rapidly. There are 2,000 men now out here and in New Jersey plants. Today 2,000 brass workers will quit and 1,000 more, including the core makers, will be out by the end of the week. It is claimed every foundry in New Jersey will be closed by the strikers.

Why the Quail Disappear.

Morocco, Ind., June 16.—The Indiana game law has proved ineffectual in perpetuating the quail, and in this county the bird is practically extinct, while in the last four years prairie chickens have thrived. This fact seems to bear out the claim of old hunters that the passing of the quail is due more to the cold winters and a lack of natural shelter, than to the sportman's gun.

Gun Bursts on Battleship.

Gibraltar, June 16.—During gun practice on board the British first-class battle ship Magnificent, off Tetuan, a 6-inch shell exploded. Eighteen persons, including four officers, were wounded, 11 of them seriously. The officers are among the seriously wounded. The explosion was due to a defect in the breech. The shell burst outside the gun.

The Average Storm Wave.

The average storm wave is thirty feet in height. The highest storm waves ever measured were between forty-four and forty-eight feet high. The gigantic force of storm waves is shown by the fact that at Skerryvore lighthouse, off the west coast of Scotland, a mass of rock weighing five and a half tons was once hurled to a height of seventy-two feet above the sea level, while a mass weighing thirteen and a half tons was torn from a cliff seventy-four feet high.

The Great Man.

It is easy in the world to live after the world's opinion; it is easy in solitude to live after your own, but the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of solitude.—Emerson.

I know of no manner of speaking so effective as that of giving praise and casting it with an exception.—Bacon.

To Scare Away Crows.

I can give a sure preventive against corn pulling by the black rogues. I had tried all sorts of devices and was rigging a scarecrow, when a gawky came along and said, "The ears of corn to the tops of poles around your field, and the crows won't stay nigh it."

I said, "They will eat the corn, and you and they will both laugh at me."

I tried the plan, however, and sure enough they looked at those poles and went away and stayed away. I suppose it was on the same principle as that of the Trojan warrior who said, "I most fear the Greeks when offering gifts."—E. P. Powell in Suburban Life.

A Biographical Dictionary.

One of the most helpful books to keep upon your table, ready to be consulted as you read other books, is a biographical dictionary. Then, when you come to some historical character about whom your knowledge is a little faded, it will require but a moment to refresh your memory and make your reading more intelligent. You have a right to the acquaintance of these distinguished men and women and should keep up at least friendly relations with them, if for no other reason than in gratitude for what they have done to make your life pleasant.—St. Nicholas.

Content.

The fountain of content must spring up in the mind, and he who has so little knowledge of human nature as to seek happiness by changing anything but his own disposition will waste his life in fruitless efforts and multiply the griefs which he purposes to remove.—Johnson.

Cured of Bright's Disease.

Geo. A. Sherman, Lisbon Red Mills, Lawrence county, N. Y., writes: "I had kidney disease for many years and had been treated by physicians for twelve years; had taken a well known kidney medicine and other remedies that were recommended but got no relief until I began using Foley's Kidney Cure. The first half bottle relieved me and four bottles have cured me of this terrible disease. Before I began taking Foley's Kidney Cure I had to make water about every fifteen minutes, day and night, and passed a brick-dust substance, and sometimes a slimy substance. I believe I would have died if I had not taken Foley's Kidney Cure." J. W. McCallum & Co.
